YETI'S PUB

THE LEGEND OF THE YETI

It is believed that there is a giant creature that dwells high in frosty peaks of the Himalayas. According to legend, the creature—called “Yeti” by locals—can be spotted when he travels to lower ground to hunt. Sightings of unusual animals and large footprints have been reported by both natives and adventurous Mount Everest climbers, but no one has ever been able to prove (or disprove) Yeti's existence.
